READY-STUDY-GO-AHEAD!
WHAT?
The Ready-Study-Go! project produced online learning material to be used before and during an on-the-job learning period abroad. The material is intended for hotel, restaurant and bakery sectors. Ready-Study-Go-Ahead project transfers the innovation into vehicle sector and into new languages.

The material consists of different writing, listening and pronunciation exercises and takes into consideration different learning styles and learners at different levels.

FOR WHOM?
Students going abroad for their on-the-job learning period can learn the target language related to their profession and get to know the working culture in the target country before they travel. The students can also benefit from the material during their on-the-job learning period abroad.

In addition to preparation the material is suitable to use in vocational language teaching, guiding foreign trainees in a company as well as self-learning material.

Language and culture learning material has already been produced in Italian, French, German, Finnish and Estonian languages. In Ready-Study-Go-Ahead new material will be produced in Spanish, Turkish and Swedish.

PROJECT INFO
Project name Ready-Study-Go Ahead! Linguistic and Cultural Coaching in Initial Vocational Education
Project number: 2009-1-FI1-LEO 05-01588
Web site: www.rsgo.eu
Co-ordinator: Omnia, the Joint Authority of Education in Espoo Region

HOW DO I SERVE CUSTOMERS IN GERMANY?
How do I serve customers in Germany?
How do you take an order in a French restaurant?

PRODUCTS
General language and culture learning material
Materials are available in Finnish, French, Estonian, German and Italian languages. Spanish, Swedish and Turkish materials are currently being produced.

Sector specific language and culture learning materials are available for restaurant, bakery and hotel sectors. New materials are currently being produced for the vehicle sector.

The sector specific materials combine language learning with the working culture in each country.

Availability: The material is available on the project website www.rsgo.fi and can be integrated into different learning environments (Moodle, Blackboard, Facebook etc.)
